ACTIVITY

A book is an object where you can see parallel, perpendicular and intersecting lines.

Suggest atleast 2 more examples having parallel, perpendicular and intersecting lines.

Two intersecting lines cut at a point. Will three lines intersect at one point? Fig.4.32 will help you to answer this.

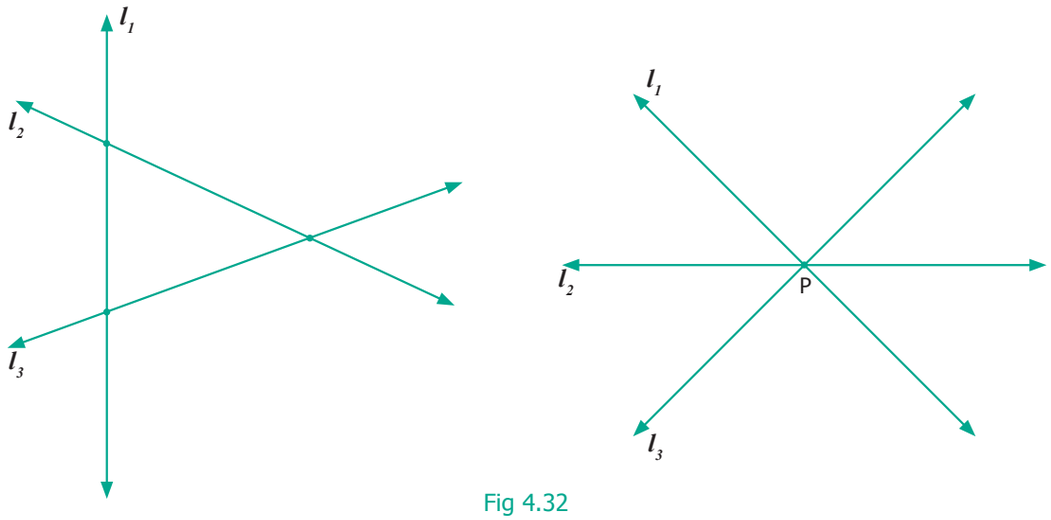

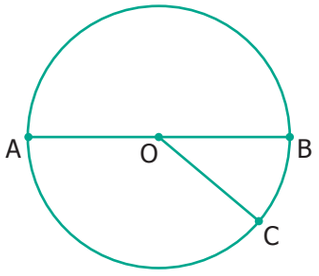

Fig 4.32

When many lines intersect at a single point, that is again special, we call that point P as a point of concurrency. The lines are called concurrent lines.

Exercise 4.3

1. Observe the diagram and fill in the blanks.

   (i) 'A', 'O' and 'B' are _____ points.

   (ii) 'A', 'O' and 'C' are _____ points.

   (iii) 'A', 'B' and 'C' are _____ points.

   (iv) _____ is the point of concurrency.

2. Draw any line and mark any 3 points that are collinear.

3. Draw any line and mark any 4 points that are not collinear.

4. Draw any 3 lines to have a point of concurrency.

5. Draw any 3 lines that are not concurrent. Find the number of points of intersection.
