5.4.2 Interpreting the Bar Graph

The data from the above Bar Graph (Fig. 5.10) can be easily interpreted and analyzed as follows.

- The maximum number of mobiles were sold on Saturday (55).
- The minimum number of mobiles were sold on Wednesday (20).
- The total number of mobiles sold in the week (50+45+40+20+35+30+55 = 275).
- The number of mobiles sold on a particular day (for example: on Friday is 30, etc.,).

ACTIVITY

Collect different data from Newspapers, Magazines, etc. and interpret them using Bar graphs.

Example 5.3

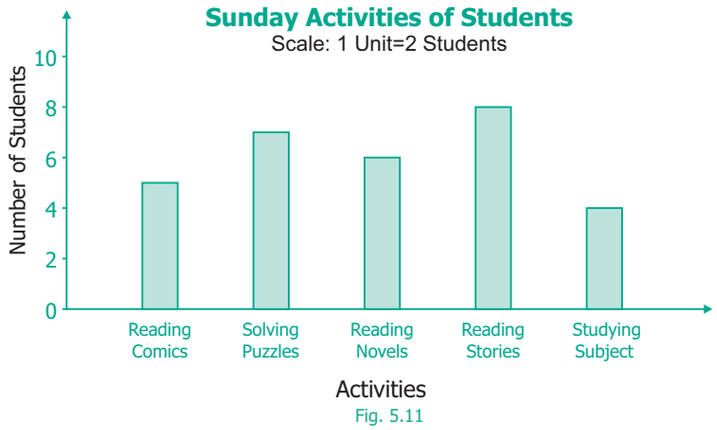

Fig. 5.11

THINK

Why are these important?

- The width of each bar is same.
- The spaces between any two bars are also the same.

Study the above Bar graph and answer the following questions.

(i) Which activity is followed by maximum number of students?

(ii) How many students in all, spend their time on solving puzzles?

(iii) The total number of students who follow either reading stories or reading their subjects is _____.

(iv) The activity followed by minimum number of students is _____.

(v) The number of students who took part in reading comics is _____.

Solution

(i) 'Reading stories' is followed by maximum number of students.

(ii) 7 students spend their time to work out solving puzzles.

(iii) 8 + 4 = 12 students spend their time on reading stories or subjects.

(iv) 'Studying subject' is followed by minimum number of students.

(v) 5 students spend their time on reading comics.

THINK

Can you use

1 unit =1 student?

Justify your answer.
