Solution

Number of tickets sold on the first day	=	1,10,000
Number of tickets sold on the second day	=	75,060
Number of tickets sold on the third day	=	25,700
Number of tickets sold on the fourth day	=	30,606
Adding all the above, the total number of tickets sold on all the 4 days	=	2,41,366

Example 1.7

In a year, a whole-sale paper firm sold 6,25,600 notebooks out of 7,50,000 notebooks. Find the number of notebooks left unsold.

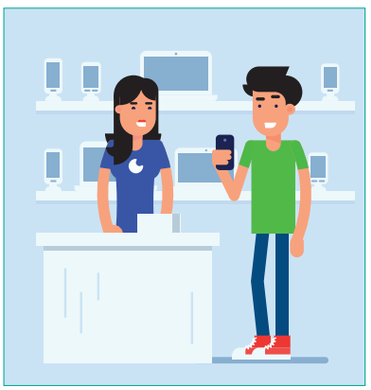

Solution

Number of notebooks in the store	=	7,50,000
Number of notebooks sold	=	6,25,600
Number of notebooks unsold	=	1,24,400

Example 1.8

In a mobile store, the number of mobiles sold during a month is 1250. Assuming that the same number of mobiles are sold every month, find the number of mobiles sold in 2 years.

Solution

Number of mobiles sold in 1 month = 1250

1 year = 12 months

2 years = 2 × 12

= 24 months

Number of mobiles sold in 24 months = 1250 × 24 = 30,000

Number of mobiles sold in 2 years = 30,000

Example 1.9

If ₹10,00,000 was distributed in a Government scheme to 500 women in the Self Help Groups, then find the amount given to each woman.

Solution

Amount to be given to 500 women = ₹10,00,000

Amount given to each woman = 10,00,000 ÷ 500 = ₹2000

Each woman in the Self Help Group was given ₹2000.
