We name the angle in fig. 4.22 (i) as ∠Q or ∠PQR or ∠RQP . Similarly, in Fig. 4.22 (ii), we may write ∠B as ∠ABC or ∠CBA.

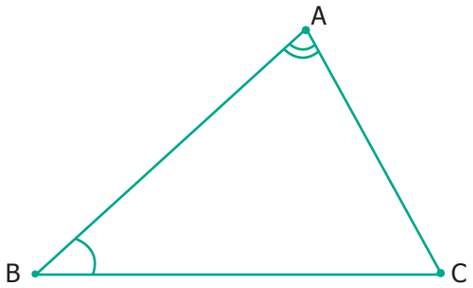

Fig. 4.23

In the Fig. 4.23, two angles are marked.

Note that ∠BAC is not the same as ∠ABC,

as they have different vertices and different sides

4.3.2 Measuring Angles

Can we measure angles too? Yes, using protractor they are measured in degrees which are denoted by the symbol ' ° '. This has to be marked at top right of a number. We write angles as 35°, 78°, 90°, 110°, 145° and so on.

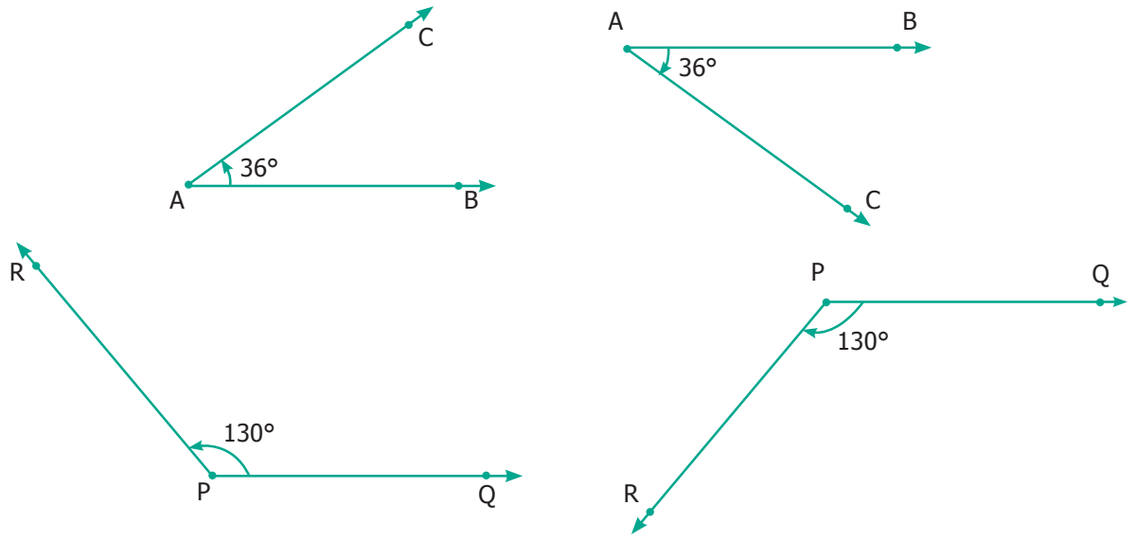

Fig. 4.24

See that angles can be equal even if they are positioned differently.

4.3.3 Special Angles

Some angles are special. 90° is one such. We call it as the right angle.
